Many people might not have heard of webkinz, so looking at the title of this article you might be thinking, "What are webkinz and why are they retired?" So let us answer this question for those people. Webkinz started out in 2005 by the Ganz Company. They are stuffed animals, now before you start thinking that stuffed animals are not special and that you can get stuffed animals anywhere and everywhere think again. These are special because somewhere on every webkinz you buy you will find a secret code that you can use online. A retired webkinz is a webkinz that is no longer made by the Ganz Company. Now if you are already interested and want to know where to buy these special toys, then you can take a look online, you will also maybe like to know that the company has actually started an online store, where you can get everything your webkinz may need.

There are many types of different webkinz, and each and every one of them is special, and they also have their own character. Okay, I would understand if you were a bit confused now, because you really do not know what we are talking about, so back to that special code. As said before, each webkinz you buy will have a secret code that you can use on the website, this will give you access to your very own online webkinz, and this virtual webkinz will look just like the one you bought in real life. Here, online, is where you can interact with your webkinz, so it will become a sort of virtual pet that you will need to take care of, bathe, clothe, feed, play with, just like those old toys some released called virtual pets, only webkinz are just way more special.
